A photograph of three ancient Greek Caryatids, female figures with their bodies carved as if they were supporting a roof, standing on a stone ledge against a clear blue sky. The statues are made of light-colored stone and show intricate details of their clothing and hair.

Natural selection

A close-up, front-facing photograph of an orangutan's head and shoulders. The orangutan has dense, reddish-brown hair on its head and neck, which transitions to a lighter, greyish-blue color on its face and chest. Its eyes are dark brown and expressive, looking directly at the camera. The skin texture is clearly visible, showing wrinkles around the mouth and eyes. The background is a soft, out-of-focus green, suggesting a natural forest environment.

The background image shows a wide-angle aerial view of a dense urban area during sunset or sunrise. The city skyline is visible, featuring numerous skyscrapers of varying heights, some with illuminated windows. In the foreground, there's a mix of green spaces and lower buildings. The sky above the city is filled with soft, horizontal clouds, transitioning from a warm orange and yellow near the horizon to a cooler blue and white at the top.

# World

A detailed micrograph of plant tissue, likely a stem or root cross-section, stained with iodine. The image shows a dense arrangement of cells with distinct boundaries. Several large, dark-stained, irregularly shaped cells are scattered throughout, which are identified as xylem vessels. These vessels have thickened, lignified walls. The surrounding tissue consists of smaller, more uniform cells, possibly mesophyll or parenchyma, with some thin-walled cells containing small, dark, granular inclusions.
